

CREATE A DATABASE IN CLOUDANT DB

The screenshot shows the IBM Cloud console interface. At the top, there's a navigation bar with 'IBM Cloud', a search bar, and user information. Below this, the 'Resource list' shows 'Cloudant-pn' with a status of 'Active'. The left sidebar has a 'Manage' section with 'Service credentials' selected. The main content area is titled 'Service credentials' and includes a description: 'You can generate a new set of credentials for cases where you want to manually connect an app or external consumer to an IBM Cloud service.' Below this is a table with columns 'Key name' and 'Date created'. The table contains one entry: 'Service credentials-1' with a date of '2022-11-08 9:21 AM'. A 'New credential' button is visible in the top right of the table area.

Key name	Date created
Service credentials-1	2022-11-08 9:21 AM

This screenshot shows the details of the 'Service credentials-1' entry. The 'Key name' column is expanded, revealing a JSON object containing API key information. The 'Date created' column remains visible on the right. The JSON object includes fields for 'apikey', 'host', 'iam_apikey_description', 'iam_apikey_name', 'iam_role_crn', 'iam_serviceid_crn', 'password', 'port', 'url', and 'username'.
